supervisor finds which
tool to call

intent finder replaced
w/ MCP client

Tool Agent
⟶ Not
needed (but can
be used
as Subgraph)

How
can we
merge
w/ MCP or
Not use it
at all

Find if
the graph
we made
would run
parallely?

In UI when building Agent
select state that you want
to Share. And you can select
multiple MCP server.

Agent would be registered
w/ MCP.

Agent ⟶ LLM + State + MCP

need
configur
ation

RAG
exposed
as tool in
MCP

document description would
be used as metadata so
that it would be exposed
properly to get exposed
to user.

Scenario 1 : One goal One Agent One MCP
if agent wants to pass state it
can directly share.

Scenario 2 : One agent + multiple MCP

Scenario 3 : One Agent ⟶ Another Agent
filtering
the
state
when passing to
another agent

by next
week
Thursday

Mandeep ⟶ backend in old Broker after
website

Aryan : Agent (RFI) ⟶ chart Agent

data ⟶ chart

Multiples agents would generate at the
end into a pdf.

SQL Agent: DB schema sampler so
find data about the user from
simple query?

Agent
MCP
